The Macrolichens of New England By James W. Hinds and Patricia L. Hinds Published by The New York Botanical Garden Press New publication is the most comprehensive work of its kind Describes 461 species; key indicators of the health of ecosystems

The Macrolichens of New England - New York Botanical Garden

Summary: This system appears in many forms, but generally consists of xeromorphic shrub vegetation (mostly evergreen oak species) with or without an emergent overstory of *Pinus clausa*. The shrubs can be very thick in places, but usually there are open patches. Ground cover is always sparse, and bare soil patches are typically evident.
