structive, algorithmic specifications for abstract software modules. The key idea in [3-5] is the definition of
operations by so-called structural recursive schemata which, roughly speaking, are a certain kind of
definitions by cases.

Requirements & Specifications Carnegie Mellon University 18-849b Dependable Embedded Systems Spring 1999 Author: Eushiuan Tran Abstract: Defining requirements to establish specifications is the first step in the development of an embedded system.

Paper for Topic: Requirements & Specifications

This paper presents an approach to writing specifications for parts of software systems. The main goal is to provide specifications sufficiently precise and complete that other pieces of software can be written to interact with the piece specified without additional information.

A technique for software module specification with examples
