The ultimate consultant: powerful techniques for the

and acceleration position of the 100m in Track and Field. The acceleration mechanics can be characterised by a long stance phase and a floating phase that is short. This position allows the athlete to apply more force and recruit muscle mass to overcome gravity. Starting and acceleration differ enormously from constant speed or maximal speed.

Speed Training: Improving Acceleration for Optimal Performance

In training there are two distinct camps emerging - those who cling doggedly to traditional training approaches and those who have thrown away the rule book and are assembling a personal toolkit of techniques drawn from a wide range of training options including storytelling, drama, music, accelerated learning, NLP techniques etc.
