

addictive behaviour cue exposure pdf

Addiction is a brain disorder characterized by compulsive engagement in rewarding stimuli despite adverse consequences. Despite the involvement of a number of psychosocial factors, a biological process "one which is induced by repeated exposure to an addictive stimulus" is the core pathology that drives the development and maintenance of an addiction.

Addiction - Wikipedia

That old saying "nature or nurture" might be better phrased "nature and nurture" because research shows that a person's health is the result of dynamic interactions between genes and the environment. For example, both genetics and lifestyle factors "such as diet, physical activity, and stress" affect high blood pressure risk.

DrugFacts: Genetics and Epigenetics of Addiction

The reward system is a group of neural structures responsible for incentive salience (i.e., motivation and "wanting", desire, or craving for a reward), associative learning (primarily positive reinforcement and classical conditioning), and positively-valenced emotions, particularly ones which involve pleasure as a core component (e.g., joy, euphoria and ecstasy).

Reward system - Wikipedia

Highlights Addictive behaviour involves the development of drug seeking habits. Habitual drug seeking and taking depend upon dorsolateral striatum. Compulsive drug seeking in addiction reflects loss of prefrontal control over habits. Impulsivity is a vulnerability factor for stimulant addiction.

From the ventral to the dorsal striatum: Devolving views

Smoking and Mental Health. There is a strong association between smoking and mental health conditions. However, people with mental health conditions are generally able to quit smoking if they are given evidenced-based support.

Students of psychology often ask their teachers, 'How can I get more marks for my answers, especially the longer ones?' One answer is, 'By using subject-specific vocabulary more effectively.'

AQA | Subject specific vocabulary

Social behaviors are universal throughout the animal kingdom and play pivotal roles in human health and society. In this Review, Chen and Hong discuss the neural circuit mechanisms and principles underlying social behaviors in rodent model systems, as well as potential areas for future research.

Neural Circuit Mechanisms of Social Behavior: Neuron

4 Mindfulness Activities for Groups and Group Therapy. In many cases, group therapy that incorporates mindfulness has shown some promising results. It has proven to be as effective as cognitive behavioral therapy (CBT), a staple of the clinical psychology world (Kocovski, Fleming, Hawley, Huta, & Antony, 2013).. There is also evidence to show that group mindfulness therapy is also as effective ...

Understanding the processes by which effects operate, and the boundary conditions of those effects, is one of the primary goals of science. In the realm of communication science, better understanding exists when we can claim how some communication-related event or phenomenon (e.g., how a news story is framed, the kind of social support a person receives during a time of crisis) affects an ...
