[167 Pages Report] The urology devices market is expected to reach USD 44.37 Billion by 2022 from USD 29.40 Billion in 2016 at a CAGR of 7.1%. The base year for this study is 2016 and the forecast period is 2017â€”2022.

Urology Devices Market by Product & Geography - Global

Endourology is a dynamic subspecialty involving closed, controlled manipulation within the genitourinary tract. In the past decade the creative efforts of many urologists, radiologists, and engineers have vastly expanded endoscopic technique, to the great benefit of patients with stones, obstruction, cancer, diverticula, cysts, adrenal disease, varices, and diseases of the bladder.

The history of animal testing goes back to the writings of the Ancient Greeks in the 4th and 3rd centuries BCE, with Aristotle (384â€“322 BCE) and Erasistratus (304â€“258 BCE) one of the first documented to perform experiments on animals. Galen, a physician in 2nd-century Rome, dissected pigs and goats, and is known as the "Father of Vivisection." ...

History of animal testing - Wikipedia

The morbidity of contemporary TURP is lower than previously reported. This is based on a continuously improving armamentarium and technique, but is also related to a significant improvement in teaching modalities, including video technology such as Video TUR and hands-on courses with phantoms.

Complications of Transurethral Resection of the Prostate

Near-infrared spectroscopy (NIRS) is a spectroscopic method that uses the near-infrared region of the electromagnetic spectrum (from 780 nm to 2500 nm). Typical applications include medical and physiological diagnostics and research including blood sugar, pulse oximetry, functional neuroimaging, sports medicine, elite sports training, ergonomics, rehabilitation, neonatal research, brain ...
