Introduction. Maintaining or improving soil health is essential for sustainable and productive agriculture. "Healthy"™ soil will help to push sustainable agricultural productivity close to the limits set by soil type and climate. Key aspects of "healthy"™ soil include the following:

Practices | Climate-Smart Agriculture Guide

Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The study of agriculture is known as agricultural ...
