2.1 Important code parameters When developing codes, there must be a way to decide which codes are good" codes. There are three main parameters used to describe and evaluate codes. The first parameter is the code length, n . In the repetition code of Example 2.3, the code length is 5, since the codewords 00000 and 11111 each contain 5 bits.

A First Course in Linear Algebra

Section P.3 Algebraic Expressions 25 Algebraic Expressions A basic characteristic of algebra is the use of letters (or combinations of letters) to represent numbers. The letters used to represent the numbers are variables, and combinations of letters and numbers are algebraic expressions. Here are a few examples.
