The contingency table can derive several evaluation "metrics" (see infobox). To draw an ROC curve, only the true positive rate (TPR) and false positive rate (FPR) are needed (as functions of some classifier parameter).

The Meaning of Character & Personality Traits. While character and personality are both used to describe someone's behaviors, the two examine very different aspects of that individual.

Positive and Negative Personality & Character Traits [2018

Positive affectivity (PA) is a human characteristic that describes how much people experience positive affects (sensations, emotions, sentiments...); and as a consequence how they interact with others and with their surroundings.. People with high positive affectivity are typically enthusiastic, energetic, confident, active, and alert. Research has linked positive affectivity with an increase ...

The performance of a diagnostic test in the case of a binary predictor can be evaluated using the measures of sensitivity and specificity. However, in many instances, we encounter predictors that are measured on a continuous or ordinal scale.

Abstract: S-systems are simple examples of power-law dynamical systems (polynomial systems with real exponents). For planar S-systems, we study global stability of the unique positive equilibrium and solve the center problem.
