Another use of the optical fiber as a sensor is the optical gyroscope which is in use in the Boeing 767 and in some car models (for navigation purposes) and the use in Hydrogen microsensors. Fibers are widely used in illumination applications.

ingly well, and I have thoroughly enjoyed the practice of optical engineering and the people associated with it for over five and a half decades. Interestingly enough, in that period, the basics of optical engineering have changed very little, although the applications of optics have undergone rapid, extensive, dynamic, and

fascinating changes.
