Abstract: The management of chronic suppurative otitis media had witnessed a profound change over the last 100 years. Most ear reconstruction can be done after successful removal of the disease. However, the main primary aim of any surgical procedure is the complete removal of bone destroying disease.

Neutering, from the Latin neuter ('of neither sex'), is the removal of an animal's reproductive organ, either all of it or a considerably large part. "Neutering" is often used incorrectly to refer only to male animals, but the term actually applies to both sexes. The male-specific term is castration, while spaying is usually reserved for female animals.

Due to the sensitivity of the subject, it is often preferable that mental health practitioners use the term behavioral health rather than mental illness. Furthermore, it is difficult for health practitioners to gain trust from their patients; therefore, mental health practitioners in Vietnam often use placebo medication to gain the trust of their patient and meet the patient's expectations.
