By Yasumichi Hasegawa. ISBN-10: 3540794336. ISBN-13: 9783540794332. This monograph offers with approximation and noise cancellation of dynamical structures which come with linear and nonlinear input/output kin. it is going to be of distinctive curiosity to researchers, engineers and graduate scholars who've really good in ?ltering concept and approach thought.

Approximate realization problem: For any given input/output map without noise $\hat{\epsilon}$. Noisy realization problem: For any given input/output map with noise $\hat{\epsilon}$. A new method called the constrained least square method is proposed to solve the problems. $\hat{\epsilon}$

What is noise? John A. Scales and ... one realization of which we take to be the well log. Operationally, we could do this by making histograms to approximate the 1- and 2-D marginals, which are sufficient to describe a Markovian process. Then we generate pseudorandom samples of this model Markovian process. This
