This volume is a systematic, expansive presentation of the major achievements in the intersection between two fields of inquiry: Argumentation Theory and Artificial Intelligence.

### **Argumentation in Artificial Intelligence | Request PDF**

Over the last ten years, argumentation has come to be increasingly central as a core study within Artificial Intelligence (AI). The articles forming this volume reflect a variety of important trends, developments, and applications covering a range of current topics relating to the theory and applications of argumentation.

Another recent development has been the adoption of argumentation models and techniques to fields in artificial intelligence, like multi-agent systems and artificial intelligence for legal reasoning. In a short paper, it is not possible to survey all these developments.

Argumentation in Artificial Intelligence examines the intersection between two fields of inquiry: Argumentation Theory and Artificial Intelligence. This book presents an overview of key concepts in argumentation theory and of formal models of argumen-tation in AI. Beginning with a review of the foundational issues in argumentation and

### **Argumentation in Artificial Intelligence - Doug Walton**

Argumentation in Artificial Intelligence is sure to become an essential resource for graduate students and researchers working in Autonomous Agents, AI and Law, Logic in Computer Science, Electronic Governance, and Multi-agent Systems. The book is suitable both as a comprehensive introduction to the field, and also as a highly organized and accessible reference for established researchers.

Argument schemes were already distinguished by Perelman and Olbrechts-Tyteca . 20 In today's artificial intelligence research on argumentation, Douglas Walton's approach to argumentation schemes (his terminology) has been widely adopted (e.g., Walton et al. 2008).

of algorithms for intelligence, such as the extent to which the shape of the fitness landscape favors hill-climbing.) We can formalize this argument as follows: 1. Evolution produced human intelligence. 2. If evolution produced human intelligence, then it is non-hard for evolutionary processes to produce human intelligence. 3.

mal argument modeling, the book expands its focus to more specialised topics, such as algorithmic issues, argumentation in multi-agent systems, and strategic aspects of argumentation. Finally, as a coda, the book presents some practical applications of argumentation in AI and applications of AI in argumentation.
