Start composting. Composting is inexpensive and relatively simple, as it uses things you would normally just throw away anyway. It creates the environment similar to a nice, fertile soil so your cannabis plants can grow healthily. You can include anything from plant clippings to fruits and vegetables to animal manure.

The NASA Clean Air Study was led by the National Aeronautics and Space Administration in association with the Associated Landscape Contractors of America (ALCA). Its results suggest that certain common indoor plants may provide a natural way of removing toxic agents such as benzene, formaldehyde and trichloroethylene from the air, helping neutralize the effects of sick building syndrome.

If you've decided to start growing cannabis for the first time, trying to figure out the best nutrients for your setup can be very confusing. There are many nutrient companies, and each company creates multiple types of nutrients for different purposes. The most important thing is to make sure you give your plants the right amount of nutrients at the right time.
