on pesticides and bio-pesticides also fall in this category. In India, 12 types of bio-insecticides are registered under Insecticides Act, 1968 and there are about 150 bio-pesticide producing companies in India. Maharashtra is the most consuming state of bio-pesticide in India and ...

Bio-Pesticide: A Clean Approach to Healthy Agriculture

Microbial pesticides consist of a microorganism (e.g., a bacterium, fungus, virus or protozoan) as the active ingredient used to control pests. The microorganism may occur naturally, be dead or alive, or be genetically engineered. Microbial pesticides can control many different kinds of pests, although each separate active ingredient is relatively specific for its target pest[s].

About Biopesticides â€œ Marrone Bio Innovations

Bio Pesticides Introduction Biopesticides are certain types of pesticides that are derived from natural materials like plants (Botanical origin), bacteria, fungi and virus (Microbial origin) and certain minerals.

Bio-Pesticides Introduction :: Agri Life

Biopesticides include naturally occurring substances that control pests, microorganisms that control pests, and pesticidal substances produced by plants containing added genetic material. Find out about these biopesticide types and more resources.

Biopesticides | Pesticides | US EPA

Types. Biopesticides can be classified into these classes- Microbial pesticides which consist of bacteria,

entomopathogenic fungi or viruses (and sometimes includes the metabolites that bacteria or fungi produce). Entomopathogenic nematodes are also often classed as microbial pesticides, even though they are multi-cellular.; Bio-derived chemicals. Four groups are in commercial use: pyrethrum ...
