Bioaugmentation. MicroClear <sup>®</sup> MicroChill <sup>®</sup> contains a unique and newly patented proprietary blend of psychrophilic microorganisms that are naturally occurring bacteria with the ability to grow at 4°C, and lower. Excellent for use in cold weather applications. Because of the diversity of the microorganisms and enzyme systems, incorporated into this product, it is excellent for use in ...

### **Bioaugmentation - Environmental leverage Inc**

Environmental remediation deals with the removal of pollution or contaminants from environmental media such as soil, groundwater, sediment, or surface water. This would mean that once requested by the government or a land remediation authority, immediate action should be taken as this can impact negatively on human health and the environment.

### **Environmental remediation - Wikipedia**

Adapted from the International Centre for Soil and Contaminated Sites (ICSS) Manual for Biological Remediation Techniques (2006) The CLU-IN focus page on DNAPLs provides additional information on bioremediation approaches and preferred conditions (aerobic or anaerobic) for numerous halogenated alkanes and halogenated alkenes, including ethanes and ethenes.

### **CLU-IN | Technologies > Remediation > About Remediation**

The Intergovernmental Data Quality Task Force (IDQTF) has developed the Munitions Response Quality Assurance Project Plan (MR-QAPP) Toolkit to assist project teams in planning for the characterization and remediation of buried munitions and explosives of concern (MEC) at Department of Defense (DoD) installations and formerly used defense sites (FUDS).

Dehalococcoides is a genus of bacteria within class Dehalococcoidia that obtain energy via the oxidation of hydrogen and subsequent reductive dehalogenation of halogenated organic compounds in a mode of anaerobic respiration called organohalide respiration. They are well known for their great potential to remediate halogenated ethenes and aromatics. They are the only bacteria known to ...
