By Javier. Here, for the first time in public, is Javier’s entire collection of massive, consensus climate science prediction failures. This collection is carefully selected from only academics or high-ranking officials, as reported in the press or scientific journals.

Some Failed Climate Predictions | Watts Up With That?

"The climate system is particularly challenging since it is known that components in the system are inherently chaotic; there are feedbacks that could potentially switch sign, and there are central processes that affect the system in a complicated, non-linear manner.

We now have the official NOAA-NASA report that 2015 was the warmest year by far in the surface thermometer record. John and I predicted this would be the case fully 7 months ago, when we called 2015 as the winner.. In contrast, our satellite analysis has 2015 only third warmest which has also been widely reported for weeks now. I understand that the RSS satellite analysis has it 4th warmest.
