How are HIV and AIDS related to cancer? | American Cancer

The overarching goal of nutrition interventions for patients with cancer or HIV/AIDS is to improve quality of life by enjoying eating and feeling strong enough to participate in normal daily activities. Eating several meals a day is a strategy to help achieve this goal, but it is not a goal.

Chapter 20: Nutrition in Cancer and HIV/AIDS My Nursing

Treatment for HIV/AIDS-related cancer varied based on the type of cancer diagnosed. Common methods of treating cancer include chemotherapy, radiation therapy, and surgery. People with HIV/AIDS face a unique challenge in treatment due to already weakened immune systems and low white blood cell counts.
