CCIE Fundamentals: Network Design and Case Studies

A common strategy for network design is to take a top-down approach. In this approach, the network In this approach, the network applications and service requirements are identified, and then the network is designed to support them.

Introducing Network Design Concepts

3 Network IP (the Internet Protocol) is the most common Net-work Layer protocol. This is the layer where routing occurs. Packets can leave the link local network and be retransmitted on other networks. Routers perform this function on a network by having at least two network interfaces, one on each of the networks to be interconnected.
