Description. La formule empirique du sulfate de vincristine est C₄₆ H₅₆ N₄ O₁₀ H₂ SO₄. La vincristine se le conoce también con los nombres LCR y VCR. Para uso farmacológico es un polvo amorfo de color blanco soluble en metanol y en agua, pero poco soluble en alcohol etílico al 95%. En su forma de sulfato de vincristina, en etanol al 98%, tiene un espectro ultravioleta con máximos ...

Colchicum autumnale, commonly known as autumn crocus, meadow saffron or naked ladies, is a toxic autumn-blooming flowering plant that resembles the true crocuses, but is a member of the Colchicaceae plant family, unlike the true crocuses which belong to the Iridaceae family. The name "naked ladies" comes from the fact that the flowers emerge from the ground long before the leaves appear.

Background. Nature has been a source of medicinal products for millennia, with many useful drugs developed from plant sources. Following discovery of the penicillins, drug discovery from microbial sources occurred and diving techniques in the 1970s opened the seas.

Natural products: A continuing source of novel drug leads

1. Introduction. Soil salination is a serious threat for agriculture. It is expected that more than 50% of all agricultural soils will be affected by salinity increase by the year 2050 (Ashraf, 1994, Vinocur and Altman, 2005). It is therefore imperative, in the context of a responsible soil management for sustainable agriculture, to discover beneficial microorganisms able to alleviate the ...

Densities of Thrips. Thrips densities in flowers can be determined by picking the flowers and placing them on a white board. Gently tear open the flower and the thrips will emerge onto the board where the adults and the larvae are readily distinguished from each other and counted.

Farmacologia. Vinorelbina Ã il primo derivato semisintetico 5'NOR degli alcaloidi della vinca. Questa molecola Ã stata ottenuta per semi-sintesi a partire dagli alcaloidi estratti dalla pervinca rosea, (*catharanthus roseus*).. Storia. Vinorelbina Ã stata scoperta nel 1980 da Pierre Potier e collaboratori del CNRS Francese e concessa in licenza al Dipartimento di Oncologia del Gruppo Pierre ...

Nanotechnology has become one of the most promising technologies applied in all areas of science. Metal nanoparticles produced by nanotechnology have received global attention due to their extensive applications in the biomedical and physiochemical fields. Recently, synthesizing metal nanoparticles using microorganisms and plants has been extensively studied and has been recognized as a green ...
