A charge-coupled device (CCD) is a device for the movement of electrical charge, usually from within the device to an area where the charge can be manipulated, for example conversion into a digital value. This is achieved by "shifting" the signals between stages within the device one at a time. CCDs move charge between capacitive bins in the device, with the shift allowing for the transfer of ...

IEEE Sensors Council publishes "A 128<sup>Å</sup>—1 Pixels, High Dynamic Range SPAD Imager in 0.18 Åµm CMOS Technology" presentation by Cheng Mao, Xiangshun Kong, Haowen Ma, Limin Zhang, Feng Yan, and Xiaofeng Bu from Nanjing University, China. "SPAD imager is proposed to achieve high dynamic range image. A SPAD chip with 128<sup>Å</sup>—1 pixels in 0.18 Åµm CMOS process is presented to show the feasibility.

A three-CCD (3CCD) camera is a camera whose imaging system uses three separate charge-coupled devices (CCDs), each one receiving filtered red, green, or blue color ranges. Light coming in from the lens is split by a complex prism into three beams, which are then filtered to produce colored light in three color ranges or "bands". The system is employed by high quality still cameras, telecine ...

PRNewswire: Pixon Imaging announces its new Extended Dynamic Range Architecture (ExDRA) - an software technique that improves low-light-level imaging in cell phone and other CMOS/CCD -based cameras. The technique utilizes charge binning, combining a full megapixel image of bright objects with a higher-sensitivity binned image of faint objects, all performed in one frame time.

A sensor is a device that measures a physical quantity and converts it into a 'signal' which can be read by an observer or by an instrument. For example, a mercury thermometer converts the measured temperature into the expansion and contraction of a liquid which can be read on a calibrated glass tube. Video cameras and a digital cameras have an image sensor.

CCD-Sensoren sind lichtempfindliche elektronische Bauelemente, die auf dem inneren Photoeffekt beruhen. â€žCCDâ€œ ist hierbei die AbkÃ¼rzung des englischen charge-coupled device (dt. â€šladungsgekoppeltes Bauteilâ€), welches im CCD-Sensor verwendet wird.. UrsprÃ¼nglich wurden 1969 CCDs fÃ¼r die Datenspeicherung entwickelt. Jedoch wurde schnell bemerkt, dass diese Bauelemente lichtempfindlich ...
