Dear Friends and Readers, I am thrilled to tell you about my new book, *How to Change Your Mind: What the New Science of Psychedelics Teaches Us About Consciousness, Dying, Addiction, Depression, and Transcendence*. The book grew out of the reporting I did for a 2015 article about psychedelic psychotherapy in the *New Yorker*, called "The Trip Treatment."

How to Change Your Mind « Michael Pollan

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 10–20 billion neurons, and the estimated number of neurons in ...

In a kind of spooky experiment, scientists at the Max Planck Institute for Human Cognitive and Brain Sciences reveal that our decisions are made seconds before we become aware of them. In the study, participants could freely decide if they wanted to press a button with their right or left hand. The only condition was that they had to remember when they made the decision to either use their ...

Brain Scans Can Reveal Your Decisions 7 Seconds Before You

If whatever gut flora enterotype we are could play an important role in our risk of developing chronic diet-associated diseases (see "What's Your Gut Microbiome Enterotype?"), can we alter our gut microbiome by altering our diet? Yes. Indeed, diet can rapidly and reproducibly alter the bacteria in our gut, as I discuss in my video *How to Change Your Enterotype*.
