

chemical dependence diagnosis treatment pdf

Addiction is a brain disorder characterized by compulsive engagement in rewarding stimuli despite adverse consequences. Despite the involvement of a number of psychosocial factors, a biological process "one which is induced by repeated exposure to an addictive stimulus" is the core pathology that drives the development and maintenance of an addiction.

Buprenorphine, sold under the brand name Subutex, among others, is an opioid used to treat opioid addiction, acute pain, and chronic pain. It can be used under the tongue, by injection, as a skin patch, or as an implant. For opioid addiction it is typically only started when withdrawal symptoms have begun and for the first two days of treatment under direct observation of a health care provider.

Buprenorphine - Wikipedia

The term "Chemical Dependency" is often used in conjunction with and at times interchangeably with the terms: chemically dependent, chemical dependence, alcoholism, addiction, substance abuse, substance dependence, drug habit, and drug addiction.

There has been a growing awareness in recent years of the importance of gender in medical treatment and research. While much past research in addiction focused on men, there is now recognition that biologic and psychosocial differences between men and women influence the prevalence, presentation, comorbidity, and treatment of substance use disorders.
