The publication closes with chapters dedicated to laser conception and one at the quantum conception of nonlinear optics. The sound advent to coherence idea and the quantum nature of sunshine and the chapter-end workouts will entice graduate scholars and rookies to the sector.

Abstract This thesis is a study of coherence theory in light in classical electromagnetism and quantum optics. Specifically two quantities are studied: The degree of first-order

Coherence in classical electromagnetism and quantum optics

mission at boundaries, dispersion, polarization effects, diffraction, coherence, ray optics and imaging, the propagation of light in matter, and the quantum nature of light. The text is designed for upper-level undergraduate students with a physics background.
