component-based software engineering (CBSE). Thus, it is also the task of this report to articulate a vision for CBSE that we can use to orient the discussion of technical concepts.

Volume II: Technical Concepts of Component-Based Software

To assess the market for component-based software engineering, the Software Engineering Institute (SEI) studied industry trends in the use of software components. The study, conducted from September 1999 to February 2000, examined software components from both technical and business perspectives. The results of this study are summarized in the

Volume I: Market Assessment of Component-Based Software

An individual software component is a package of code that encapsulates a set of related functions or data. Although, the behavior of the component's component based software engineering pdf download code may change based on the application's extensibility, provided by its writer.
