

computer aided verification 19th pdf

Department of Computer Science - People: Niki Trigoni. Interests. Professor Trigoni's interests lie in intelligent and autonomous sensor systems with applications in positioning, healthcare, environmental monitoring and smart cities. Please contact her if you are interested in applying for a DPhil, postdoc or senior software engineer position in one of the following areas: Indoor positioning ...

Department of Computer Science: Niki Trigoni

In computer science, specifically software engineering and hardware engineering, formal methods are a particular kind of mathematically based technique for the specification, development and verification of software and hardware systems. The use of formal methods for software and hardware design is motivated by the expectation that, as in other engineering disciplines, performing appropriate ...

Formal methods - Wikipedia

Automated theorem proving (also known as ATP or automated deduction) is a subfield of automated reasoning and mathematical logic dealing with proving mathematical theorems by computer programs. Automated reasoning over mathematical proof was a major impetus for the development of computer science.
