Computers and Education

3 The average student progress in the experimental schools, when the system was installed, was of 38% of the progress expected (or hoped for) by the Ministry of Education. After four years of computer-assisted learning in arithmetic, the average student progress reached 84% of the Ministry's expectations.

Computers in Education in Developing Countries: Why and How?

Computers in Education. Computers enable storage of data in the electronic format, thereby saving paper. Memory capacities of computer storage devices are in gigabytes. This enables them to store huge chunks of data. Moreover, these devices are compact. They occupy very less space, yet store large amounts of data.

Role of Computer in Education - WikiEducator

A computer cannot learn and, unless told to do so, won't respond to anything. Think of it as a very dumb dog that you have to teach to catch a ball every day and every time you want to play. 1. Computers do very complex math. Mind you, it is always related to the basics: add, subtract, multiply and divide.
