A submarine is a specialized watercraft that can operate underwater at very high pressures beyond the range of unaided human survivability. Submarines, first widely used in World War I, are used by all major navies today, especially the American, Russian and British navies. Civilian submarines and submersibles are used for marine and freshwater science and for work at depths too great for human ...

"It is with the submarine that the initiative and full freedom of the seas rests. The aircraft carrier, whatever realistic scenario of action is drawn--that of operations in great waters or of amphibious support close to shore--will be exposed to a wider range of threat than the submarine must face.
