Get Conductor: Distributed Adaptation for Heterogeneous

Conductor allows adaptation to be distributed to the points in the network where it is required. Further, Conductor allows arbitrary adaptations without compromising reliability.

(PDF) Conductor: Distributed Adaptation for Complex

Conductor: Distributed Adaptation for Heterogeneous Networks is designed to meet the needs of a professional audience composed of researchers and practitioners in industry and graduate-level students in computer science.

Conductor: Distributed Adaptation for Heterogeneous

PDF | ^TM ^TM~ ~ Most network applications provide poor service when the network's capabilities are below a minimum level assumed by the developer. As a wider array of network technologies become ...

(PDF) Conductor: A Framework for Distributed Adaptation

Distributed adaptation allows both detection of end-to-end network characteristics and the deployment of a coordinated solution for multiple simultaneous problems.

Distributed Adaptation: A Research Proposal - UCLA

Conductor allows distributed adaptation by providing an adaptation framework at various nodes throughout the network. Conductor consists of essentially two parts: adaptors that operate on a data stream and a runtime environment that supports adaptors. Adaptors have the

Mark D. Yarvis's Conductor: Distributed Adaptation for

Conductor: Distributed Adaptation for Heterogeneous Networks describes a new approach to graceful degradation in the face of network heterogeneity - distributed adaptation - in which adaptive code is deployed at multiple points within a network.

Conductor: Distributed Adaptation for Heterogeneous

An adaptation service should help applications select a datapath that, together with a set of adaptations, results in the desired end-to-end quality of service. Because Conductor provides service ...
