Conquering Heart Disease The Heart Disease Problem Cardiovascular disease (CVD), or heart disease, is the leading global cause of death, killing approximately 17.4 million individuals per year, which accounts for almost a third of all deaths worldwide (World Health Organization, 2017).

Past Projects | Conquering Heart Disease

pressure. It is the leading cause of heart attacks and strokes. If your blood pressure goes too low you may feel lightheaded. If it goes too high there might not be any symptoms, or it could trigger a stroke. If blood pressure remains high, it can lead to congestive heart failure, kidney failure, hardening of the arteries, stroke, and other complications.
