### **Conservation and Management of Wildlife and Habitat**

the management and conservation of archaeological sites. The bibliography is conceptually organized under two major headings. The first is Conservation and Management of Archaeological Sites, whose literature reflects the dual origins of archaeological site conservation in monument conservation and cultural resource management respectively.

Wildlife Conservation (cont.) Today, wildlife conservation has evolved into a science, but its goal remains essentially the same: to ensure the wise use and management of renewable resources. Given the right circumstances, living organisms that we call renewable resources can replenish themselves indefinitely.

Biomonitoring of change lies at the core of ecosystem conservation, management and restoration. As

biomonitoring is an obligation today, biomonitoring programs are framed by government organizations (e.g. European Commission, Joint Nature Conservation Committee in the United Kingdom).
