

construction equipment management pdf

Construction management (CM) is a professional service that uses specialized, project management techniques to oversee the planning, design, and construction of a project, from its beginning to its end. The purpose of CM is to control a project's time, cost and quality—sometimes referred to as a project's "triple constraint."

Construction project management requires the skills and expertise of a traditional project manager but applied to the construction industry. Because a construction project is always shifting, an ideal construction project manager must possess a large array of experience and know-how to handle diverse teams and meet assorted objectives.

Beginner's™ Guide to Construction Project Management

Construction is the process of constructing a building or infrastructure. Construction differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client. Construction as an industry comprises six to nine percent of the gross domestic product of developed ...
