Initial driving position and posture guide

Squatting is a posture where the weight of the body is on the feet (as with standing) but the knees and hips are bent. In contrast, sitting, involves taking the weight of the body, at least in part, on the buttocks against the ground or a horizontal object such as a chair seat. The angle between the legs when squatting can vary from zero to widely splayed out, flexibility permitting.

List of human positions - Wikipedia

Kaye Kinder and Classroom Chairs. The Kaye Kinder Chair is designed as an adjustable seat that can be used to help ensure the user is positioned properly while sitting.

“How does my bad posture cause a Dowager's hump?” • The problem “The more forward your head sits, the more stress is placed on the base of your neck.. The result “To cater for the extra stress, the body: a) lays on thick connective tissue and b) thickens the bone/joint at the base of your neck. This is the body's attempt to support your heavy head (which gets even heavier the ...
