

creativity and hci from pdf

SIGCHI is the world's largest association of professionals who work in the research and practice of computer-human interaction. What brings us together is a shared understanding that designing useful and usable technology is an interdisciplinary process, and when done properly it has the power to transform persons' lives.

ACM SIGCHI - Special Interest Group on Computer-Human

The International Journal of Design is a peer-reviewed, open-access journal devoted to publishing research papers in all fields of design, including industrial design, visual communication design, interface design, animation and game design, architectural design, urban design, and other design related fields. It aims to provide an international forum for the exchange of ideas and findings from ...

General Topics and Issues in HCI, Design & Computer Graphics. The following constitute overviews and are mainly pieces for a general audience.

Papers Index - Bill Buxton

An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.

Richard Wayne Bandler (born February 24, 1950) is an American author and trainer in the field of self-help. He is best known as the co-creator (with John Grinder) of Neuro-linguistic programming (NLP), a methodology to understand and change human behavior-patterns. He also developed other systems named Design Human Engineering (DHE) and Neuro Hypnotic Repatterning (NHR).

Sketching User Experiences approaches design and design thinking as something distinct that needs to be better understood by both designers and the people with whom they need to work in order to achieve success with new products and systems. So while the focus is on design, the approach is holistic. Hence, the book speaks to designers, usability specialists, the HCI community, the product ...

Our world runs on information, with more and more aspects of daily life having information technologies and digital systems at their core. Topics such as open-source software, virtual organizations, online political campaigns, digital television, social media, and computer games need to be understood and advanced from both a technical and human perspective simultaneously.
