

critical care neurology and pdf

Critical care neurology has generated interest both because of the urgency to understand acute brain injury and because acute interventions could improve outcomes. Unifying themes include intervention without delay and early recognition of the potential for deterioration of the patient.

Critical care neurology | Neurology Clinical Practice

Neurointensive care is a relatively new field that has developed as a subspecialty of critical care and neurology. The goal of neurointensive care, and the neurointensivist, is to treat and prevent primary and secondary brain (or other nervous system) injury. Inherent in this goal are the monitoring tools unique to
