PDF | In this paper, we present a new hybrid algorithm which is a combination of a hybrid Cuckoo search algorithm and Firefly optimization.

### **(PDF) A new hybrid cuckoo search and firefly optimization**

Nature-inspired algorithms such as cuckoo search and firefly algorithm have become popular and widely used in recent years in many applications. These algorithms are flexible, efficient and easy to implement.

The Cuckoo Search (CS) and the Firefly Algorithm (FA) are relatively new swarm intelligence metaheuristics and they have been proven to be effective methods for solving some hard optimization problems. In this article, their application to the multilevel thresholding problem is investigated.

For test data generation and optimization, two approaches are considered such as Cuckoo Search and Firefly techniques. Through these techniques the objective is to check the maximum code coverage and get the best optimum results.

Even so, some theoretical studies about cuckoo search in the current literature can be summarized, as follows: A conceptual comparison of the cuckoo-search, particle swarm optimization, differential evolution and artificial bee colony algorithms [13]. Enhancing the performance of cuckoo search algorithm using orthogonal learning method [46].
