

detection of light from pdf

3 LiDAR Platforms aerial - for highly detailed, local elevation data satellite - covers large areas with less detail
LiDAR Operational Theory A pulse of light is emitted and the precise time is recorded. The reflection of that pulse is detected and the precise time is recorded.

Light Detection and Ranging (LiDAR)

Lidar (also called LIDAR, LiDAR, and LADAR) is a surveying method that measures distance to a target by illuminating the target with pulsed laser light and measuring the reflected pulses with a sensor. Differences in laser return times and wavelengths can then be used to make digital 3-D representations of the target. The name lidar, now used as an acronym of light detection and ranging ...

US Patent 10,000,000

Optical heterodyne detection is a method of extracting information encoded as modulation of the phase, frequency or both of electromagnetic radiation in the wavelength band of visible or infrared light. The light signal is compared with standard or reference light from a "local oscillator" (LO) that would have a fixed offset in frequency and phase from the signal if the latter carried null ...

Optical heterodyne detection - Wikipedia

were prepared. Afterwards, 0.3 Åµl of diluted blood were deposited on white wall-tiles and dried at ambient temperature. After spraying the Bluestar® solution and the commercial luminol solution on the bloodstains, the light intensity was measured.
