

diagnosis of process nonlinearities pdf

In this book, Higher Order Statistical (HOS) theory is used to develop indices for detecting and quantifying signal non-Gaussianity and nonlinearity. These indices, together with specific patterns in the mapping of process output and controller output are used to diagnose the causes of poor control loop performance.

Diagnosis of Process Nonlinearities and Valve Stiction

Valve stiction is the hidden culprit of the process control loop. Among all nonlinearities of control valve, stiction has been being one of the major valve problems since the past two decades.
