DIFFERENTIAL GEOMETRY - Eindhoven University

Plane and Space: Linear Algebra and Geometry The purpose of this course is the study of curves and surfaces, and those are, in general, curved. Nevertheless, our main tools to understand and analyze these curved objects are (tangent) lines and planes and the way those change along a curve, resp. surface.

Elementary Differential Geometry: Curves and Surfaces

To the student This is a collection of lecture notes which I put together while teaching courses on manifolds, tensor analysis, and differential geometry.

Lectures on Differential Geometry - University of Ottawa

This book covers both geometry and differential geometry essentially without the use of calculus. It contains many interesting results and gives excellent descriptions of many of the constructions and results in differential geometry. This text is fairly classical and is not intended as an introduction to abstract 2-dimensional Riemannian geometry.

Introduction to Differential Geometry Robert Bartnik January 1995 These notes are designed to give a heuristic guide to many of the basic constructions of differential geometry.
