The project focuses on techniques for image enhancement using various filters such as image enhancement using the laplacian filter and high-boost filtering. Principle objective of Spatial Domain Image Processing is to process an image so that result is sharper than original image for specific application.

Digital Image Processing Using MATLAB, 2nd ed. PDF

digital image processing is an extensive set of functions for processing mul-tidimensional arrays of which images (two-dimensional numerical arrays) are a special case. The Image Processing Toolbox is a collection of functions that extend the capability of the MATLAB numeric computing environment.

Introduction to Digital Image Processing

Digital image processing deals with manipulation of digital images through a digital computer. It is a subfield of signals and systems but focus particularly on images. DIP focuses on developing a computer system that is able to perform processing on an image.
