theoretical, research and policy themes, summarizes major areas of controversy, and identifies a range of alternative visions for early childhood. INTRODUCTION Enhancing the quality of young childrenâ€™s lives is now a national and international priority, expressed through research and policy initiatives, programme development and advocacy.

Changing perspectives on early childhood: theory, research

Oral disease is the greatest unmet healthcare need of disadvantaged children in the United States, with only 20% of disadvantaged Medicaid-eligible children receiving routine dental care. Peter Margolis proposed a theoretical model of access to healthcare services and reported the effectiveness of a case manager intervention in increasing medical care utilization by disadvantaged mothers and infants.

According to Bandura's (1982) self-efficacy theory, efficacy is the major determinant of effort, persistence, and goal setting. Empirical research supports this notion, suggesting that individuals with higher self-efficacy tend to be more motivated and successful on a given task (Pintrich & DeGroot, 1990).
