germ diseases, while the use of the term contagion is rightly limited to such diseases as are produced principally through individual contact. \_Parasitic diseases\_ are very common among domestic animals. This class of disease is caused by insects and worms, as for example, lice, mites, ticks, flies, and round and flat worms that live at the expense of their hosts.

### **Common Diseases of Farm Animals - KASHVET**

Prevention is the key to controlling animal diseases. Sanitation is the key to prevention of diseases. Most disease-causing agents enter the body through some type of body opening, such as the nose, eyes, mouth, or wound incision. Pathogens may be spread by direct contact, or indirectly by the wind, water, feed, or other animals.
