Definition Standard normal distribution. The simplest case of a normal distribution is known as the standard normal distribution. This is a special case when  $\mu = 0$  and  $\sigma = 1$ , and it is described by this probability density function:  $f(x) = \frac{1}{\sigma\sqrt{2\pi}} e^{-\frac{(x-\mu)^2}{2\sigma^2}}$ . The factor  $\frac{1}{\sigma\sqrt{2\pi}}$  in this expression ensures that the total area under the curve  $f(x)$  is equal to one. The factor  $\frac{1}{\sigma}$  in the exponent ensures that the distribution has unit ...
