Distortion Analysis in Analog Integrated Circuits November 15, 2002 1 Distortion Analysis in Analog Integrated Circuits Mohamed A. Y. Abdulla I. Abstract This paper reviews different techniques used in the literature to analyze distortion in analog integrated circuits. It concentrates on analytical techniques rather than on numerical techniques.

This work presents an adaptation to the definition of the Integral Nonlinear Function (INLF) for distortion analysis of analog multipliers. Up to this time distortion in two-input multipliers has been evaluated by applying a constant signal to one of the inputs and verifying the linearity of the response with respect to the other input.
