3 accordance with problems detected, fundamental requirements for versatile enterprise-level software design and implementation have been classified.

Enterprise Resource Planning Systems: the Integrated Approach

OASIS Committee Specifications. Produced By: Approved. Advanced Message Queuing Protocol (AMQP) Enforcing Connection Uniqueness Version 1.0. Committee Specification 01

Standards | OASIS

DNP3 (Distributed Network Protocol) is a set of communications protocols used between components in process automation systems. Its main use is in utilities such as electric and water companies. Usage in other industries is not common. It was developed for communications between various types of data acquisition and control equipment. It plays a crucial role in SCADA systems, where it is used ...

DNP3 - Wikipedia

A blockchain, originally block chain, is a growing list of records, called blocks, which are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a merkle tree root hash).. By design, a blockchain is resistant to modification of the data. It is "an open, distributed ledger that can record ...

Blockchain technology—the platform underpinning Bitcoin, a global digital payment system—has attracted more than \$1.2 billion of investment from some of the world’s leading corporations for its security and immutability. 1 More than 130 million secure Bitcoin transactions have occurred since the digital currency launched in 2009. 2 Today, Bitcoin can be used to make purchases from ...

Blockchain technology in health care: A primer for

The architectural style and principles. The architecture style defining a SOA describes a set of patterns and guidelines for creating loosely coupled, business-aligned services that, because of the separation of concerns between description, implementation, and binding, provide unprecedented flexibility in responsiveness to new business threats and opportunities.
