In this review we describe and discuss several approaches to selecting higher plants as candidates for drug  
development with the greatest possibility of success. We emphasize the role of information derived from  
various systems of traditional medicine (ethnomedicine) and its utility for drug discovery purposes.

available potent synthetic drugs lies in their toxicity and reappearance of symptoms after discontinuation.  
Therefore, the screening and development of drugs for their anti-inflammatory activity is the need of hour and  
there are many efforts for finding anti-inflammatory drugs from indigenous medicinal plants<sup>10</sup>.

The psychoactive substance in Cannabis, THC, is unique in that it contains no nitrogen and is not an indole, tryptamine, phenethylamine, anticholinergic (deliriant), or a dissociative drug. Cannabis plants tend to vary, with different strains producing dynamic balances of cannabinoids (THC, CBD, etc.) yielding markedly different effects.
