

dynamic clamp from principles pdf

Dynamic-clamp is a fascinating electrophysiology technique that consists of merging living neurons with computational models. The dynamic-clamp (also called "conductance injection") allows experimentalists and theoreticians to challenge neurons (or any other type of cell) with complex conductance stimuli generated by a computer.

Dynamic Clamp From Principles To Application | Document

Dynamic-clamp is a captivating electrophysiology method that consists of merging dwelling neurons with computational fashions. The dynamic-clamp (additionally referred to as "conductance injection") permits experimentalists and theoreticians to problem neurons (or another sort of cell) with complicated conductance stimuli generated by a pc.

Dynamic Clamp From Principles To Applications 1st Edition

Dynamic- Clamp: From Principles to Applications contains contributions from leading researchers in the field, who investigate these paradigms at the cellular or network level, in vivo and in vitro, and in different brain regions and cardiac cells.
