paper, we consider logistics service providers (LSP), carriers, and courier / express / parcel (CEP) companies. Postal operators, too, are relevant players in the context of logistics and CEP. Not only business models but profitability and margins differ considerably. In contrast with other industries, profits in logistics are relatively low.

### **Shifting patterns: The future of the logistics industry - PwC**

For the logistic function, if  $0 \leq a \leq 4$  and  $0 \leq x_0 \leq 1$ , the dynamics will be confined to  $[0, 1]$ . Let's observe the dynamics in the logistic map as we increase the value of  $a$ . For  $a=0$ ,  $f(x)=0$ , independently of  $x_0$ . If we increase  $a$  a bit, we can see that after some iterations, independently of  $x_0$ , the dynamics will reach  $x_n=0$ .
