This account of the ecological requirements of the European otter *Lutra lutra* has been produced as part of Life in UK Rivers – a project to develop methods for conserving the wildlife and habitats of rivers within the Natura 2000 network of protected European sites. The project's focus has been the conservation of rivers identified as Special Areas of Conservation (SACs) and of relevant ...

### **Ecology of the European Otter (IN111) - Natural England**

Active research into the ecology and conservation of ponds is being undertaken in many European states, addressing different areas of relevance. One of the chief problems is the lack of integration between these research areas, and a general poor level of understanding of patterns of variation in habitats and biota across

Europe.

### **The ecology of European ponds: defining the**

A river is a body of water flowing along a natural channel. It is a part of the water cycle. Water evaporates from water bodies such as rivers, lakes and seas, and from plants and trees.
