multi-modal urban transport operators in order to assess economies of scale and scope. The results suggest that the industry is characterized by increasing returns to scale and economies of scope. Several European countries have introduced a competitive tendering procedure in the assignment of franchised monopoly in the local transport industry.

### **Economies of scale and scope in local public transportation**

Transport represents a huge proportion of the world's economic activity. The EnoFoundation's annual Transportation in America compendium of statistics estimates that passenger transport represents 10 per cent of the United States' Gross Domestic Product, and freight transport another 6 per cent.

### **Economic Regulation of Transport: Principles and**

result is that transportation costs exhibit regional external economies of scale. Because the economies of scale are external, a tariff is a way to coordinate price taking consumers and producers into concentrating trade and exploiting those economies. Since the economies are regional in scope, no country can unilaterally internalize them.
