

### **education and economic growth pdf**

Even before and certainly ever since the 1983 release of *A Nation at Risk* by the National Commission on Excellence in Education, national economic competitiveness has been offered as a primary reason for pushing school reform. The commission warned, "If only to keep and improve on the slim competitive edge we still retain in world markets, we must dedicate ourselves to the reform of our ..."

Economic growth is the increase in the inflation-adjusted market value of the goods and services produced by an economy over time. It is conventionally measured as the percent rate of increase in real gross domestic product, or real GDP. Growth is usually calculated in real terms - i.e., inflation-adjusted terms "to eliminate the distorting effect of inflation on the price of goods produced."

Economic growth since 1965 has varied inversely with the share of natural capital in national wealth across countries. Four main channels of transmission from abundant natural resources to stunted economic development are discussed: (a) the Dutch disease, (b) rent seeking, (c) overconfidence, and (d) neglect of education.

Economic inequality covers a wide variety of topics. It can refer to either income distribution, measuring the amount of money people are paid, or the distribution of wealth, which captures the amount of wealth people own. Inequality among nations is covered in international inequality and countries listed by income inequality. For the United States, see United States income inequality, United ...

The focus on human capital as a driver of economic growth for developing countries has led to undue attention on school attainment. Developing countries have made considerable progress in closing the gap with developed countries in terms of school attainment, but recent research has underscored the importance of cognitive skills for economic growth.
